CAREER OBJECTIVE

Detail-oriented **Junior Full-Stack .NET Developer** skilled in C#, ASP.NET Core, SQL Server, and modern web technologies. Experienced in designing relational databases, building secure RESTful APIs, and developing responsive frontend interfaces. Eager to leverage strong problem-solving abilities and full-stack software development principles to build scalable, high-performance web applications.

EDUCATION

Faculty of Computers and Informatics, Zagazig University — *Sharqia, Egypt* Sep 2023 – Expected July 2027
Bachelor of Science in Information Technology | Cumulative Grade: Very Good

EXPERIENCE & TRAINING

Digital Egypt Pioneers Initiative (DEPI) — *Ministry of Communications & Information Technology* May 2026 – Present

.NET Full-Stack Software Engineering Trainee

- Participating in an intensive technical track focused on enterprise full-stack web development using C#, .NET Core, and Microsoft technologies.
- Building full-stack web applications by integrating backend RESTful APIs with modern relational databases and responsive frontend interfaces.
- Applying industry-standard software engineering practices, clean code principles, version control workflows with Git/GitHub, and Agile methodologies.

PROJECTS

Library Management System Database ([GitHub Repo](#))

Relational Database Architecture & T-SQL Development

- Designed and normalized a scalable relational database schema using T-SQL and SQL Server Management Studio (SSMS) to streamline library operations and book inventory tracking.
- Implemented complex stored procedures, triggers, and views to automate data validation, fine management, and transaction logging.
- Optimized SQL query execution and search speeds by configuring clustered/non-clustered indexes and enforcing relational integrity constraints.

LUGX Store - E-Commerce Gaming Platform ([GitHub Repo](#))

Frontend Web Development

- Developed a responsive gaming e-commerce web interface using HTML5, CSS3, and JavaScript, providing an intuitive browsing experience for gaming products.
- Engineered structured product layout grids and interactive navigation components across various desktop and mobile viewports.
- Integrated client-side UI dynamics and clean styling patterns to improve page navigation speed and user engagement.

Micro-Freelance Hub Architecture & Prototype

System Design & Conceptual Prototype

- Architected the system workflow, platform features, and user interaction model for a localized micro-freelance marketplace application.

- Created comprehensive technical documentation, ERD diagrams, and functional specifications to guide end-to-end full-stack development.

TECHNICAL SKILLS

Programming Languages: C#, T-SQL, JavaScript, HTML5, CSS3

Backend & Web Development: ASP.NET Core, Entity Framework Core, RESTful APIs, LINQ, .NET Framework

Databases & ORM: SQL Server, T-SQL Scripting, Database Normalization, ERD Modeling, EF Core

Tools & Version Control: Visual Studio, VS Code, SQL Server Management Studio (SSMS), Git, GitHub

Core Concepts: Object-Oriented Programming (OOP), Data Structures, Algorithms, SOLID Principles

COURSES & CERTIFICATES

- **Full-Stack .NET Web Development Track** — Digital Egypt Pioneers Initiative (DEPI) | *In Progress*
- **Database Design & T-SQL Programming** — Academic / Self-Study | 2026
- **Object-Oriented Programming & Data Structures in C#** — Academic Coursework | 2025
